

CLAIMS

- 1 1. A selective bird feeder, comprising:
2 a selective housing having at least one sidewall and a base;
3 a removable top supported by the at least one sidewall of the selective housing;
4 and
5 a seed holder contained within the selective housing.
- 1 2. The selective bird feeder of claim 1, further including a space disposed
2 between a sidewall of the seed holder and the at least one sidewall of the selective
3 housing.
- 1 3. The selective bird feeder of claim 2, wherein the space is about 1.0
2 inches.
- 1 4. The selective bird feeder of claim 3, wherein the space is about 1.5
2 inches.
- 1 5. The selective bird feeder of claim 4, wherein the space is about 2.0
2 inches.
- 1 6. The selective bird feeder of claim 1, wherein the seed holder is
2 supported on the base of the selective housing.
- 1 7. The selective bird feeder of claim 6, wherein the base of the selective
2 housing is substantially solid.

1 8. The selective bird feeder of claim 6, wherein the base of the selective
2 housing includes apertures.

1 9. The selective bird feeder of claim 1, wherein the at least one sidewall
2 of the selective housing includes apertures having a maximum dimension of about 1.0
3 inches.

1 10. The selective bird feeder of claim 1, wherein the at least one sidewall
2 of the selective housing includes apertures having a maximum dimension of about 1.5
3 inches.

1 11. The selective bird feeder of claim 1, wherein the at least one sidewall
2 of the selective housing includes apertures having a maximum dimension of about 2.0
3 inches.

1 12. The selective bird feeder of claim 6, wherein the top of the selective
2 housing is substantially solid.

1 13. The selective bird feeder of claim 6, wherein the top of the selective
2 housing includes apertures.

1 14. The selective bird feeder of claim 1, wherein the top of the selective
2 housing includes apertures having a maximum dimension of about 1.0 inches.

1 15. The selective bird feeder of claim 1, wherein the top of the selective
2 housing includes apertures having a maximum dimension of about 1.5 inches.

1 16. The selective bird feeder of claim 1, wherein the top of the selective
2 housing includes apertures having a maximum dimension of about 2.0 inches

1 17. The selective bird feeder of claim 1, wherein the removable top directly
2 contacts the seed holder.

1 18. The selective bird feeder of claim 17, wherein the seed holder includes
2 a cap, and the removable top directly contacts the cap.

1 19. The selective bird feeder of claim 1, wherein the removable top is
2 spaced apart from the seed holder.

1 20. The selective bird feeder of claim 1, wherein the removable top
2 includes an aperture through which a portion of the seed holder extends.

1 21. The selective bird feeder of claim 19, wherein the seed holder includes
2 a cap, and further comprising a space between the removable top and the cap.

1 22. The selective bird feeder of claim 21, wherein the spacing between the
2 cap and the removable top is adjustable.

1 23. The selective bird feeder of claim 21, wherein the spacing between the
2 cap and the removable top is adjustably limited.

1 24. The selective bird feeder of claim 1, wherein the top of the selective
2 housing is substantially solid.

1 25. The selective bird feeder of claim 1, wherein the top of the selective
2 housing includes apertures.

1 26. The selective bird feeder of claim 1, wherein the seed holder extends
2 through the top.

1 27. A selective bird feeder, comprising:
2 a selective housing having a cylindrical sidewall and including apertures
3 having a width ranging from about 1.3 inches to about 1.7 inches;
4 a removable top supported at least on the cylindrical sidewall of the selective
5 housing;
6 a cylindrical seed holder contained within and spaced apart from the
7 cylindrical sidewall of the selective housing; and
8 a hanger attached to the selective bird feeder;
9 wherein the removable top is in direct contact with the cylindrical seed holder
10 and the sidewall of the selective housing.

1 28. The selective bird feeder of claim 27, wherein the selective housing
2 includes a base on which the seed holder is supported.

1 29. The selective bird feeder of claim 27, wherein the seed holder includes
2 a base on which the selective housing is supported.

1 30. The selective bird feeder of claim 27, wherein the hanger is attached
2 to the top.

1 31. The selective bird feeder of claim 27, wherein the hanger is attached
2 to the seed holder.

1 32. A selective bird feeder, comprising:
2 a selective housing having at least one sidewall and a base, the at least one
3 sidewall of the selective housing including a plurality of apertures;

the seed holder further including a cap spaced apart from the removable top,
and further including a hanger attached to the cap.
